SUMMARY

Results-driven Senior Backend Engineer with 7+ years of experience building scalable distributed systems in fintech. At Niyo, delivered microservices supporting 3M+ users and 200K DAU, handling 200+ req/sec with 99.9% uptime. Improved API latency by 80% and reduced database latency by 60%. Skilled in Node.js, NestJS, MongoDB, Kafka, and AWS.

SKILLS

- **Backend & APIs:** Node.js, NestJS, TypeScript, REST APIs
- **Databases & Caching:** MongoDB, MySQL, Redis (Amazon ElastiCache)
- **Messaging & Event Streaming:** Apache Kafka, AWS SNS, AWS SQS
- **Cloud & DevOps:** AWS (Lambda, S3, API Gateway, CloudWatch), GCP Cloud Functions, Docker, Kubernetes (Basics), CI/CD Pipelines
- **Observability & Security:** Datadog, Grafana, AWS CloudWatch, SonarQube, Snyk
- **Architecture & Design:** Microservices Architecture, Event-Driven Architecture, System Design, Scalability & Performance Optimization
- **AI & Developer Productivity:** Prompt Engineering, Cursor, Kiro, Antigravity (AI-assisted development tools)
- **Tools & Collaboration:** Git, Jira, Postman, Figma, Agile/Scrum
- **Frontend (secondary):** React.js, Next.js

EXPERIENCE

Jun 2022—Current

SDE-II — Finnew Solutions (Niyo), Bengaluru

- Designed and scaled microservices architecture handling 200+ req/sec and serving 200K+ daily active users across multi-bank onboarding, Agent App, and TravelTech services (Visa, Lounge, eSIM).
- Led end-to-end development of customer onboarding platform, acquiring 3M+ users and driving measurable improvements in revenue and customer experience (NPS).
- Optimized system performance, reducing API response time by 80% (500ms → 100ms) and improving MongoDB query latency by 60% through indexing and query optimization.
- Engineered scalable and resilient systems, including zero-downtime customer migration and serverless event-driven workflows (AWS Lambda, SNS, SQS), ensuring high availability and cost efficiency.

Jan 2021—May 2022

Senior Software Engineer — Glynk India, Bengaluru

- Designed and built a white-label community platform serving 500K+ users across multiple partner brands, supporting dynamic partner configurations and branded experiences.
- Engineered advanced content-moderation system with profanity filtering and community-guidelines enforcement to maintain platform trust at scale.
- Ensured smooth handling of large concurrent user bases through robust architecture, horizontal scaling strategies, and performance profiling.

Jan 2018—Dec 2020

Software Engineer — Kloh Internet, Bengaluru

- Built and scaled the Kloh event hosting platform to support 1,000+ events/week and 100+ active partners, delivering partner-facing tools for event creation and management.
- Developed a rule-based payment routing module that intelligently directed transactions across payment providers, improving success rates and reducing processing costs.
- Delivered seamless end-user event discovery and booking experience, contributing to strong platform retention metrics.

Jan 2018—Dec 2020

Software Engineer Intern — Ewhents Technologies, Bengaluru

- Contributed to a seminar and webinar event-hosting platform, enabling partners to create, publish, and market online events to end users.

EDUCATION

2014—2017

Imt, Kumaun University, Bachelor of Computer Applications, Uttarakhand

ACHIEVEMENTS

2023

Niyo Hackathon Winner — Built an automation platform to auto-provision Bitbucket repositories, SonarQube projects, and Kong routes post ticket approval, reducing manual setup effort and accelerating developer onboarding
